

SHANGHAI*by Giuseppe Bavuso for Alivar*

This new version of the Shanghai bookcase from the Home Project Collection is bigger than before, at 312 cm in length and 237 cm in height for a scenic touch that's even more spectacular. The outer frame is available in painted black or heat-treated oak, while the irregular inner shelves made from expanded Baydur and coated with grey or matt-lacquered spatulated cement provide new and unexpected shapes. alivar.com

ANTIPODE*by Verter Turrone for Imperfetto Lab*

To ancient Greeks, the word Antipode combines anti-, meaning "opposite," with the root pod-, meaning "foot": just like the two and one opposite zoomorphic feet of the new Imperfetto Lab dining table. It does not tremble or give way because it has found an unshakable balance point between the carbonized wood-effect black fiberglass feet and a Fenix anti-scratch round top. imperfettolab.com

LIV CHAIR*by Alessandro Dubini for i4Mariani*

Designed for comfort, the LIV chair boasts a sophisticated appearance and graceful posture. Characterized by soft lines, its enveloping seat is ergonomic, with pockets in the backrest that encase vertical extensions from the solid walnut wood base. The padded interior of the backrest is covered in a choice of leather or fabric, while the outside is covered in leather, masterfully hand stitched by skilled artisans.

i4mariani.com**EASTERN INSPIRATION***by Angelo Cappellini*

This incredible table features a luxuriant tropical landscape skillfully illustrated with inlaid brass on a larch wood surface. The body of the table is clad in a layer of metal with a brushed brass finish for a sophisticated and multi-faceted tactile effect. Shapes of Eastern inspiration decorate the grey oak surface of the second table featuring, an elegant carp alongside a water lily. angelocappellini.com

**BEANIE SOFA***by Nea Studio*

The Beanie Sofa is a comfortable textile-covered sofa that incorporates daybeds facing opposite directions. The wooden structure of the backrest, as well as the soft seat, are filled with organic latex and lentil beans that support the natural curves and movements of the body. The sofa is LEED certified, and is made entirely of organic materials. neastudio.com
